Topics for working groups

Policy
co-
design

Group #1

Conditions for trust in data relationships

Policy recommendations for trustworthy data relationships:
What does one need to consider to establish trust?

Group #2

Empowering service users with their data

Policy recommendations for increasing meaningful agency through and with data for service users.

Group #3

Predictive and proactive scenarios

Policy recommendations for transitioning from reactive to proactive services in the public sector

Empowered Data Societies

Group 1

Table of contents

1. Introduction	
2. Overview: Psychology of trust and how trust mechanisms can apply to data interactions (Justine)	2
3. Perspectives on data interactions and trust (Allan, Lisa, Marnie)	2
3.1. Data empowerment for innovation: Trust can be created through legal and social mechanisms in order to share more data (Allan)	2
3.2. Empowerment for individuals: More sharing is not the end goal, it is necessary to strengthen controls/limitations on sharing in order to build trust (Lisa)	2
3.3. Empowerment for communities: Collective and civil society interrogation of data to create trust through a better understanding of those served (Marnie)	2
4. Key relationships in data ecosystems from different perspectives	3
5. Spotlight: invisible populations and trust with data (Carlos)	3
6. Role of policy and regulation in facilitating trust relationships	
7. Conclusion

Group 3: Proactive services

Draft deliverable outline	3
1. Introduction	3
2. Case study/ies	3
3. Elements of success	4
4. Lessons from advertisers	4
5. Policy recommendations	4
5.1. Pre-requisites	4
5.2. Ethical considerations	
5.3. Cybersecurity considerations	
Conclusion	

Blueprint for data analysis in the transition to proactive services

Experi-
ment

Blueprint

- Guaranteed human-centric
- Historical data analysis necessary in the earliest stages of service development and design
- Elemental in transitioning from reactive to proactive services
- Replicable across domains and scalable to different use cases

Helsinki Experiment

- Concrete business case at the city of Helsinki
- Political and strategic commitment (both at city and national level)
- Vast historical data sets from four years of service use
- Expertise and resources combined from Helsinki and the WEF community

Review Committee*

Claudia Juech
Executive Director,
Cloudera Foundation

Guy Diedrich,
Global Innovation
Officer, Cisco

Amy Holcroft,
Chief Privacy Officer,
HPE

Angela Lungati
Executive Director,
Ushahidi

Lucas Camara
Executive Director,
C4IR Brazil

Juliana Vida,
Chief Technical
Advisor, Splunk

Mikko Rusama
Chief Digital Officer,
City of Helsinki
