

Empowered Data Societies

Project update

Thursday, 3 December

The Project

Objective: Develop a human-centric framework to increase data availability for empowering societies, with a special focus on public-private collaborations

Partner: City of Helsinki, Government of Finland

Timeline: July 2020-June 2021

Old problems
(unavailable data)

+

New concept
(human-centricity)

=

Practical solutions
(good data policy)

Project objectives

1. Co-design a deployable, human-centric data policy framework to empower societies
2. Test and trial an aspect of the framework at the City of Helsinki
3. Multi-stakeholder dialogue and deliberation with a committed project community
4. Demonstration of thought leadership in data policy
5. Paving the way for long-term collaboration between C4IR and Finland

Methodology

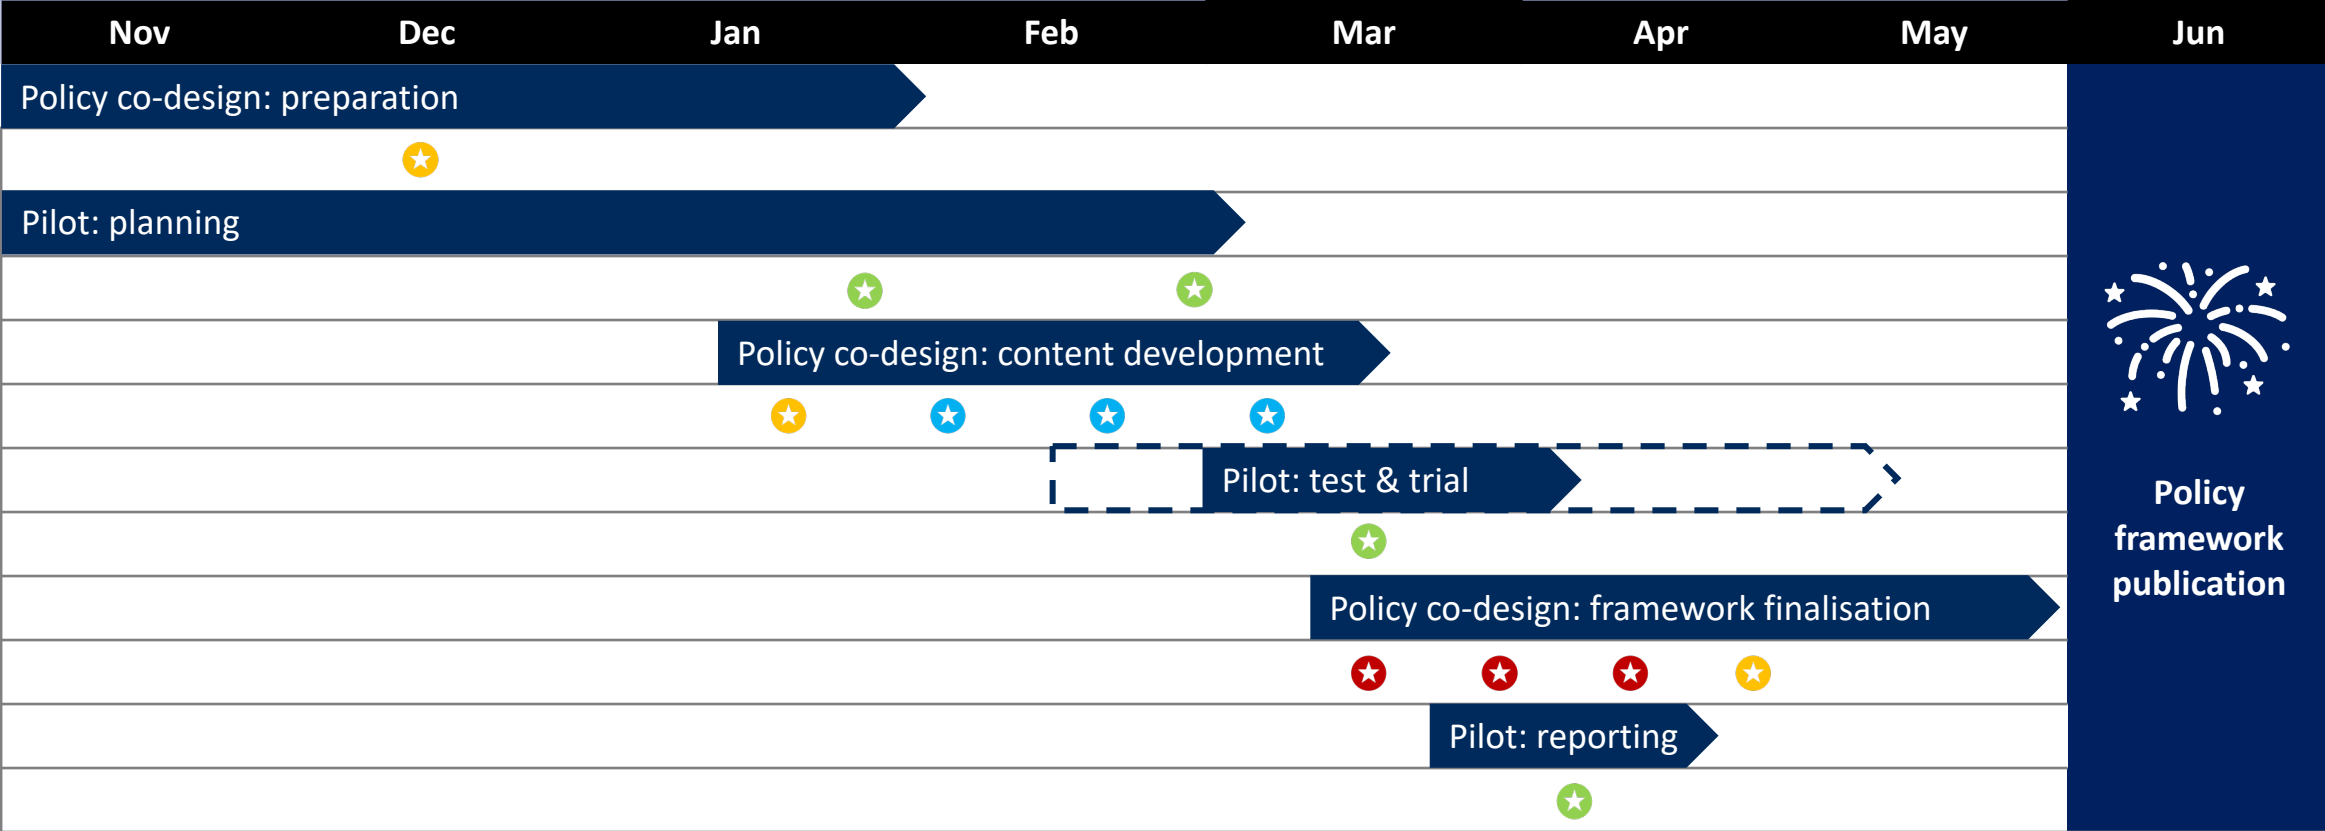

Policy co-design & pilot: Spring 2021

1. A diverse and international, multi-stakeholder community of experts motivated to solve shared issues, about 30 in total
2. Set of discreet but interconnected working groups to tackle specific (kinds) of policy challenges, 3-5 in number
 - Specific topics to be defined for January
3. A steering committee composed of working group chairs to ensure coherence throughout
4. Most promising work product(s) to be piloted in the city of Helsinki and refined based on the experience
 - Dedicated group to be collected to pilot with the city

Policy co-design, piloting, and finalisation timeline

- ★ Full project community workshop
- ★ Working groups workshop
- ★ Steering group workshop
- ★ Helsinki piloting group meeting (exact dates depend on final piloting schedule)

Kiitos!
