Satisfaction Survey on the EIRA and Cartography Tool workshop

Satisfaction Survey on the EIRA and Cartography Tool workshop

This survey aims at collecting feedback, views and opinions of the participants of the workshops on European Interoperability Reference Architecture (EIRA) and the identified functionalities of the Cartography Tool (CarTool).

1. Please indicate the extent to which you agree with the following statements:

Based on my workshop experience, I believe that the EIRA has potential value for...

	(1) Strongly disagree	(2) Disagree	(3) Somewhat disagree	(4) Neither agree or disagree	(5) Somewhat agree	(6) Agree	(7) Strongly agree	Don't know No opinion
Designing and documenting solution architectures								
Comparing solution architectures								
Creating solution portfolios								
Managing solution portfolios								
Rationalising solution portfolios								
Supporting impact assessments on ICT								

2. Please indicate the extent to which you agree with the following statement:

	(1) Strongly disagree	(2) Disagree	(3) Somewhat disagree	(4) Neither agree or disagree	(5) Somewhat agree	(6) Agree	(7) Strongly agree	Don't know No opinion
Overall, based on my workshop experience, the EIRA has potential value for supporting interoperability.								

2.1. Please provide us with any comment you may have on your answer to question 2.

3. Please indicate the extent to which you agree with the following statements:

"Based on my pilot experience, I believe that the following identified functionalities of the CarTool have potential value for…"

	(1) Strongly disagree	(2) Disagree	(3) Somewhat disagree	(4) Neither agree or disagree	(5) Somewhat agree	(6) Agree	(7) Strongly agree	Don't know No opinion
Ability to use the EIRA as the GUI for finding solution building blocks								
Ability to use the EIRA as the GUI for creating search queries.								
Ability to select **interoperable** solution building blocks in the search query								
Ability to select **reusable** solution building blocks in the search query								
Ability to import EIRA- and ADMS-compliant Archi files.								
Ability to export EIRA- and ADMS-compliant Archi files.								
Ability to access a national-only Cartography of solution building blocks.								
Ability to access a federated European Cartography of solution building blocks.								

4. Please indicate the extent to which you agree with the following statement:

	(1) Strongly disagree	(2) Disagree	(3) Somewhat disagree	(4) Neither agree or disagree	(5) Somewhat agree	(6) Agree	(7) Strongly agree	Don't know No opinion
Overall, based on my workshop experience, the **CarTool** has potential value for supporting interoperability.								

4.1. Please provide us with any comment you may have on your answer to question 4.

5.	We would be glad to receive further feedback or suggestions you might have on the EIRA and/or the CarTool.

6. Please indicate your full name. *In case you prefer to remain anonymous, you can skip this question.*

7. Please indicate the name of your organisation.

Legal notice: As this survey collects and further processes personal data, Regulation (EC) 45/2001 of the European Parliament and the Council of 18 December 2000, on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data, is applicable. The following personal data is collected: full name, organisation, evaluation scores. This information will be made available to employees and contractors on behalf of the DG for Informatics, Unit B.6 (ISA programme) of the European Commission, who might use this information to contact you and to follow up on the questionnaire. No personal data will be published or shared with others without your permission.
