GAIA-X entering its operational phase

Almost €190 m in funding for GAIA-X flagship projects

© BMWi

The Federal Ministry for Economic Affairs and Energy is launching a [funding competition](#) (in German) for “innovative and practical applications and data spaces in the digital GAIA-X ecosystem”, which will be used to support applications based on the digital [GAIA-X infrastructure](#). In other words, GAIA-X is entering its operational phase. The funding competition is now open to consortiums composed of users and suppliers working in business, science, and the public sector. Submissions of project abstracts can be made until 7 May 2021.

adesso laajentaa pohjoiseen – jatkoa kansainvälistymiselle
**adesso perustaa adesso Nordics -yksikön Suomeen –
laajentaa Pohjois-Euroopan alueelle**

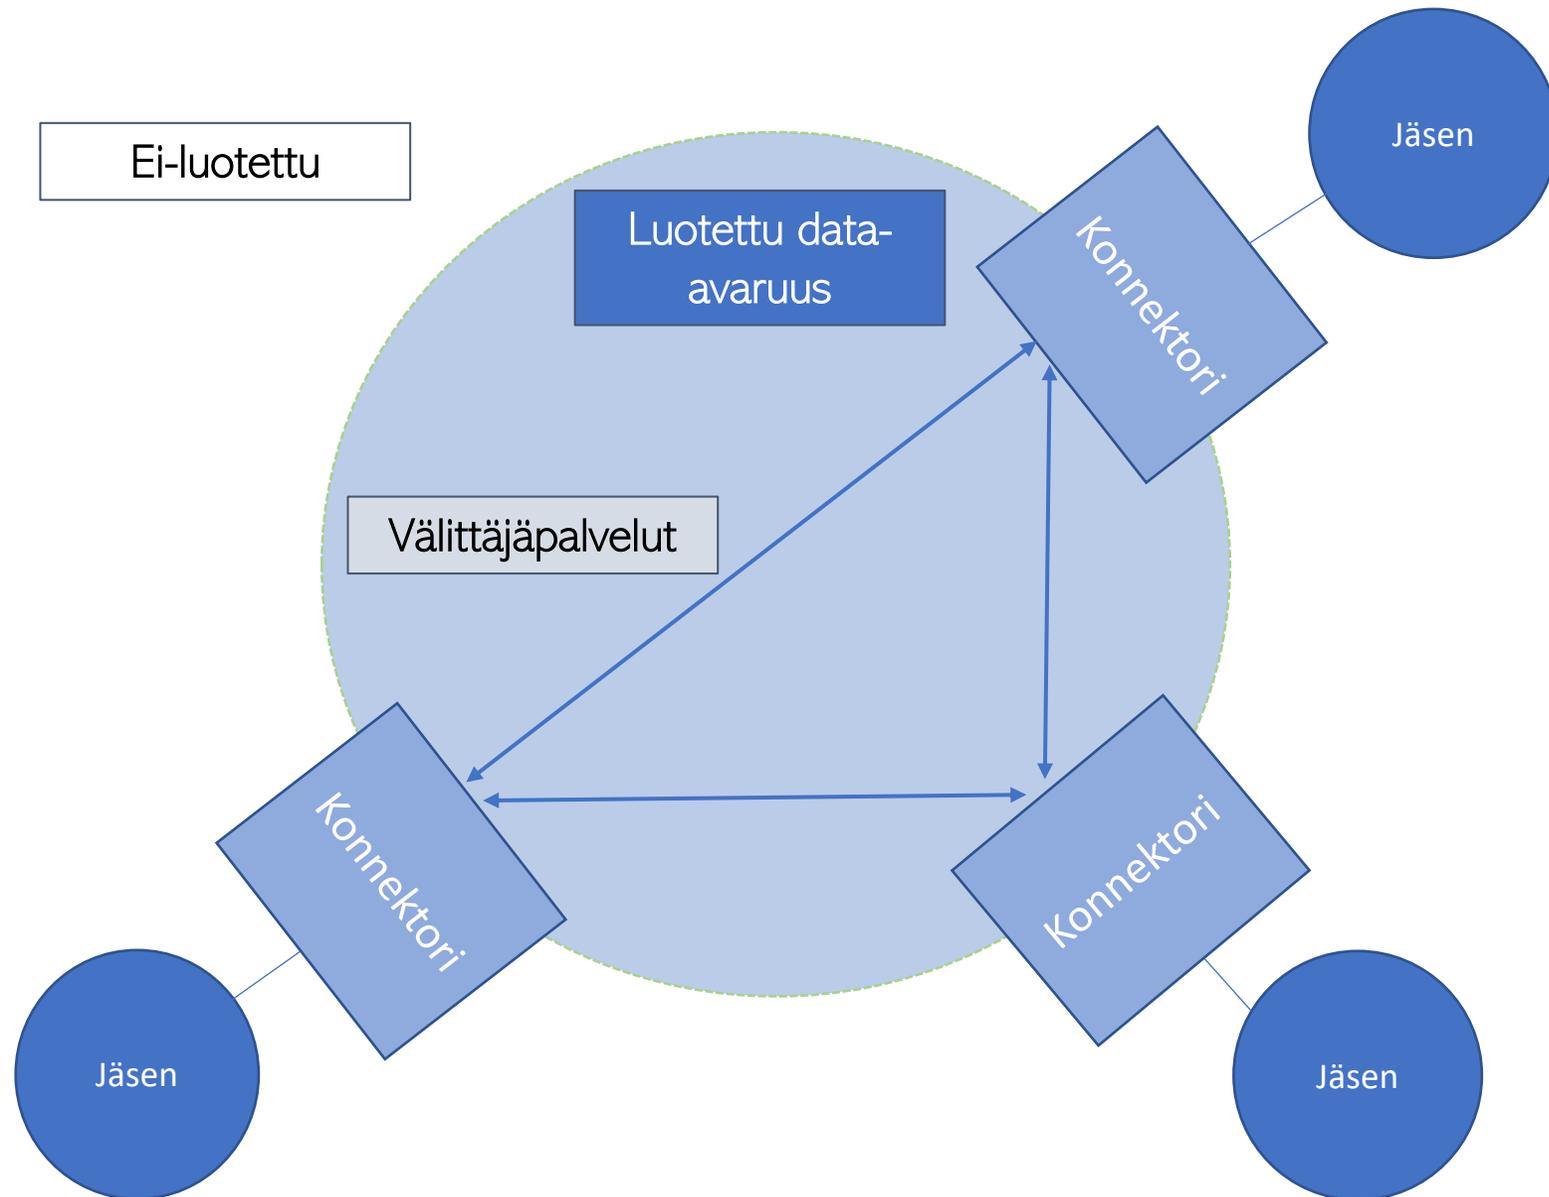

- adesso perustaa Pohjois-Euroopan ensimmäisen tytäryhtiön adesso Nordics Oy:b
- adesso Nordics vastaa adesson palveluiden ja teknologian myymisestä ja markkinoinnista pohjoismaiden ja baltian alueella.
- adesso perustaa dataliiketoimintaan ja teknologioihin erikoistuvan yksikön adesso Lakes GmbH:n Saksaan yhteistyössä suomalaisen alan erikoistuneen yrityksen 1001 Lakes Oy kanssa

Dortmund/Helsinki, 8. kesäkuuta 2021 – adesso astuu ensimmäistä kertaa Pohjois-Eurooppaan. Adesso tuo johtavan keskieurooppalaisen IT ja ohjelmistokehitysosaamisen ja teknologitarjonnan saataville Pohjois-Euroopassa toimiville asiakkaille uuden pääkaupunkiseudulle perustetun adesso Nordics Oy:n kautta. Uusi yhtiö vastaa palveluvalikoiman myymisestä ja markkinoinnista Pohjoismaissa ja Baltiassa.

Organisaatiokeskeinen datatalous

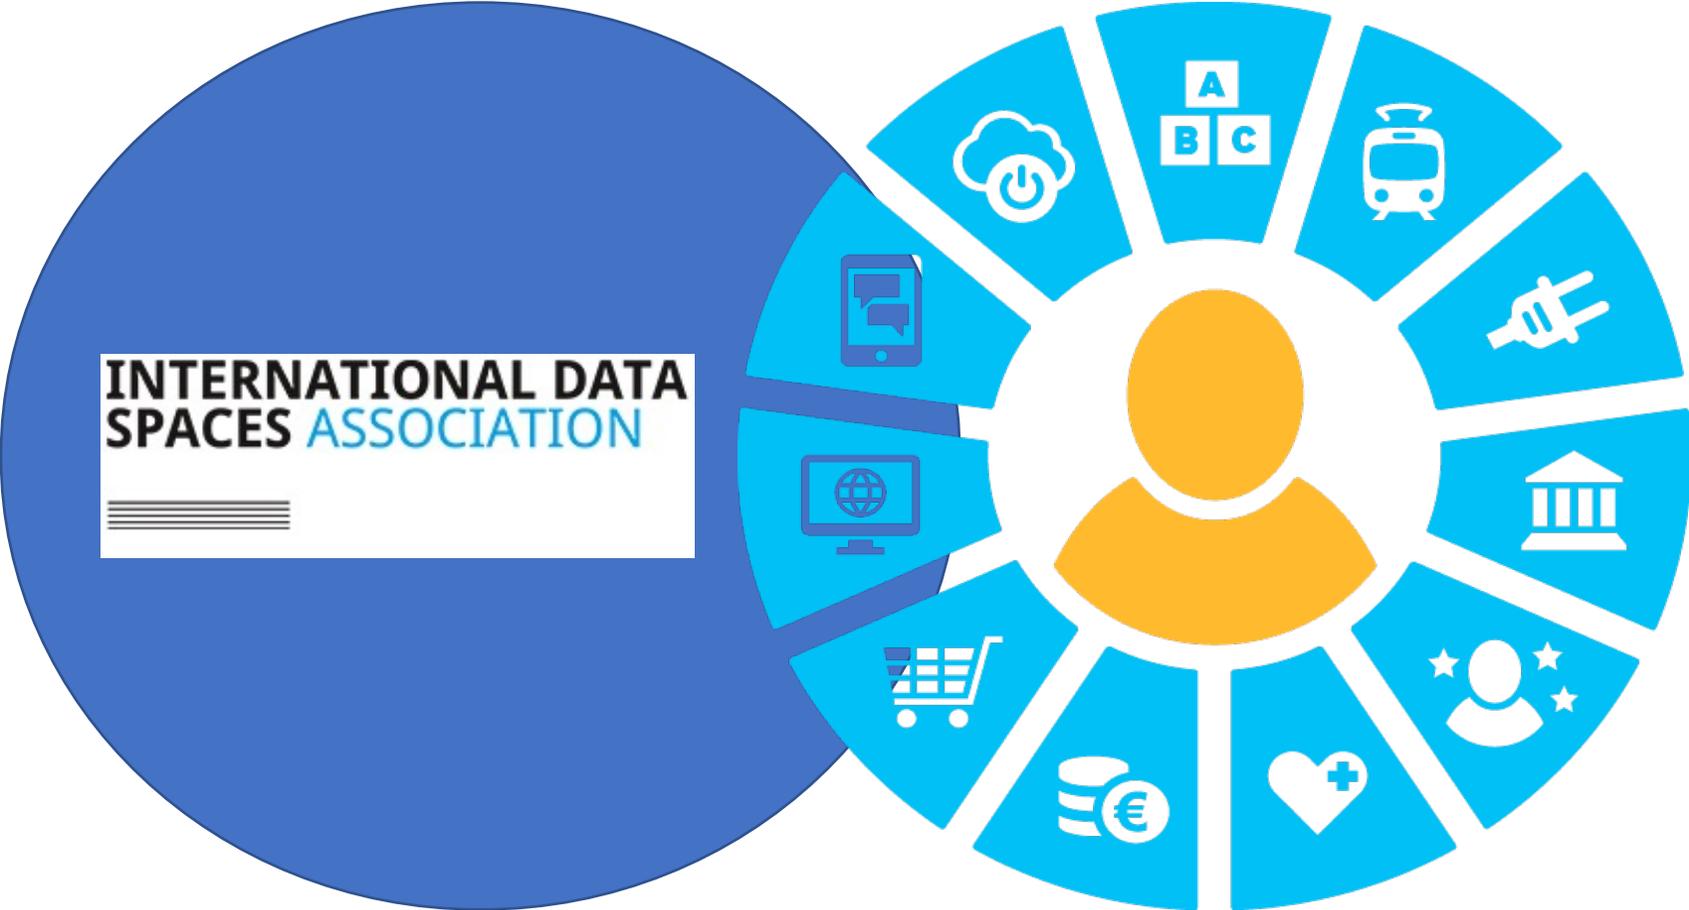

Verkostokeskeinen datatalous

Ihmiskeskeinen datatalous

Data space and industrial domain experts team up to define for the first time cross-sectoral and across initiatives the fundamental design principles to build data spaces.

Data-avaruuksien suunnitteluperiaatteet

#1 Data sovereignty

The capability of a natural person or organisation for exclusive self-determination with regard to its economic data goods. This is the innovative and transformative concept underlying data spaces.

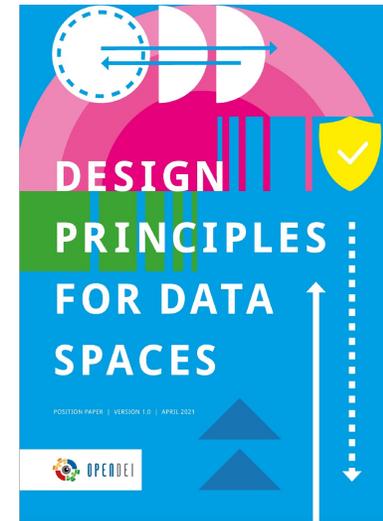

INTERNATIONAL DATA
SPACES ASSOCIATION

Data-avaruuksien suunnitteluperiaatteet

#2 Data level playing field

New entrants face no insurmountable barriers to entry because of monopolistic situations. When a data level playing field exists, players compete on quality of service, and not on the amount of data they control. A data level playing field is a pivotal condition to create a fair data sharing economy.

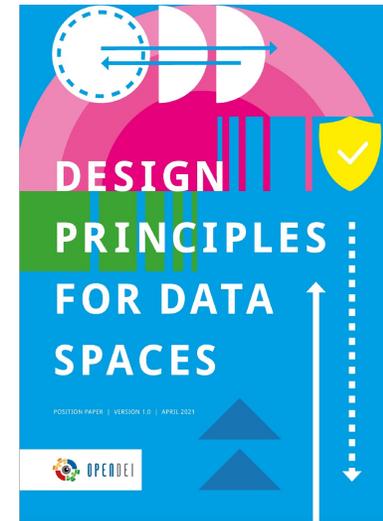

INTERNATIONAL DATA SPACES ASSOCIATION

Data-avaruuksien suunnitteluperiaatteet

#3 Decentralised soft infrastructure

The data sharing infrastructure is not a monolithic centralised IT infrastructure. It is a collection of interoperable implementations of data spaces which comply to a unified set of agreements in all dimensions: functional, technical, operational, legal and economic. Out of the principle of data sovereignty follows functional and non-functional requirements of interoperability, portability, findability, security, privacy and trustworthiness.

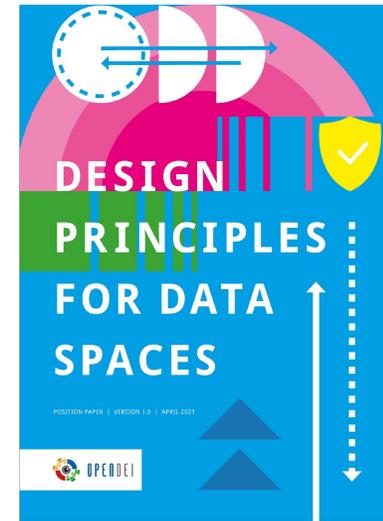

INTERNATIONAL DATA
SPACES ASSOCIATION

Data-avaruuksien suunnitteluperiaatteet

#4 Public-private governance

For the design, creation and maintenance of the data level playing field a sound governance is essential. All stakeholders need to feel represented and engaged. These include users (persons, organisations) or provider of data services as well as their technology partners and professionals.

INTERNATIONAL DATA
SPACES ASSOCIATION

N x

Data spaces as ecosystem

Data spaces based on common design principles enable a dynamic, secure and seamless flow of data/information between parties and domains as well as entirely new services for users, based on enhanced transparency and data sovereignty. A new user behavior and digital culture arises, as users learn to play by the rules and use data (both their own and other users' data) in an ethical way. Data spaces as federation enable multiple participants to discover data resources across underlying platforms and their administrative domains.

N x

Synthesis of building blocks to data spaces

As all participants implement the same minimal set of functional, legal, technical and operational agreements and standards, they can interact in the same manner, no matter what data space they are operating in. Key building blocks and roles will be part of each data space. Some elements of the building blocks will be similar for multiple spaces and will therefore be part of the general soft infrastructure. Other elements of the building blocks will need to be customised to work for sector-specific data spaces.

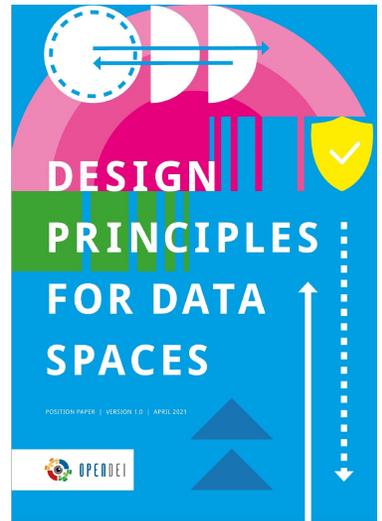

1 x

Soft Infrastructure and neutral building blocks

The soft infrastructure provides a level playing field for data sharing and exchange. It is made up of technology-neutral and sector-agnostic agreements and standards specifying how organisations and individuals can participate in the data economy and how they need to act and behave in compliance with commonly agreed rules and directives.

INTEROPERABILITY	TRUST	DATA VALUE	GOVERNANCE
Data Models & Formats	Identity management	Metadata & Discovery Protocol	Overarching cooperation agreement
Data Exchange APIs	Access & usage control / policies	Data Usage Accounting	Operational (e.g. SLA)
Provenance and traceability	Trusted Exchange	Publication & Marketplace Services	Continuity model

Datan käytön kontrolli

1. Allow the usage of the data
2. Inhibit the usage of the data
3. Restrict the data usage for a group of users or systems
4. Restrict the data usage for specific purposes
5. Restrict the data usage when a specific event has occurred
6. Use or do not use the data in a specific time interval
7. Use the data not more than N times
8. Use data and delete it after
9. Modify data (in transit)
10. Modify data (in rest)
11. Log the data usage information
12. Notify a party or a specific group of users when the data is used
13. Share the data under specific circumstances

Strategic
Data Innovation Board (DIB)

Advise the Commission on:

1. Consistent practices across spaces
 2. Standards cross-sectoral
 3. Build upon and contribute to existing standards
- “Facilitate the interoperability of data as well as data sharing services”*

Tactical & Operational
Data Exchange Board (DEB)

Makes it happen

1. Define the authorisation framework
 2. Represent all users and adopters
 3. Drive and execute adoption
- “Create, maintain and further develop the authorisation framework”*

governances

Makes it fit for purpose

1. Define the data space tools and adjusted infrastructures
 2. Represent domain users and adopters
 3. Drive and execute sectoral adoption
- “Adjust framework to sectoral driven needs while remaining interoperable”*

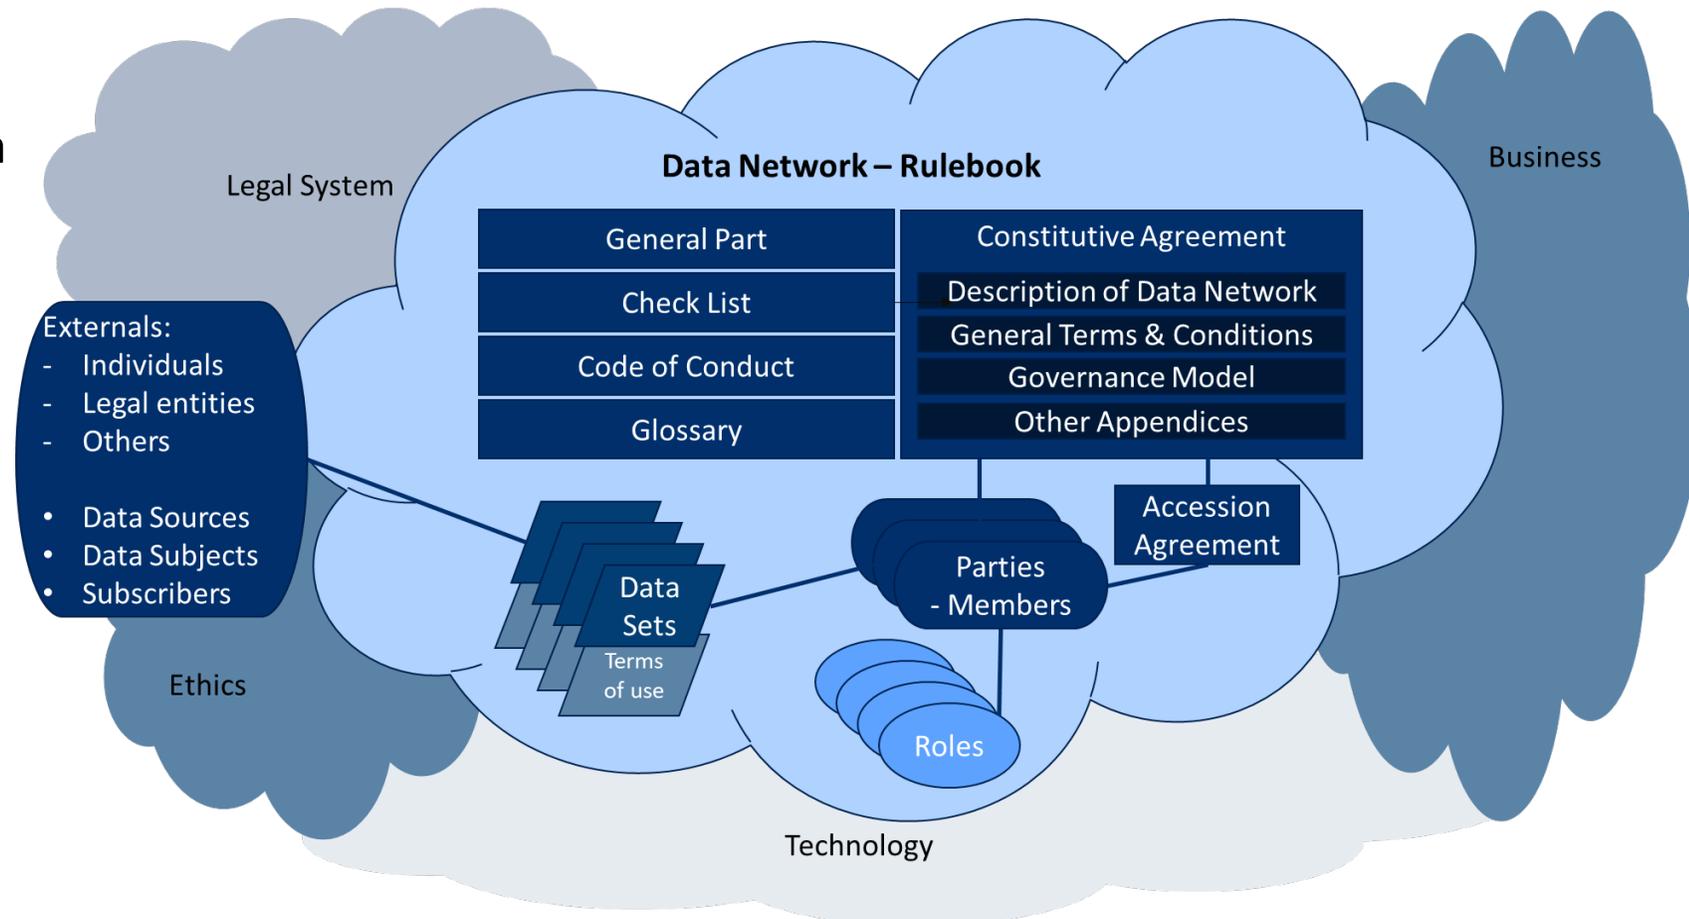

INTERNATIONAL DATA SPACES ASSOCIATION

Reilun datatalouden sääntökirjamalli

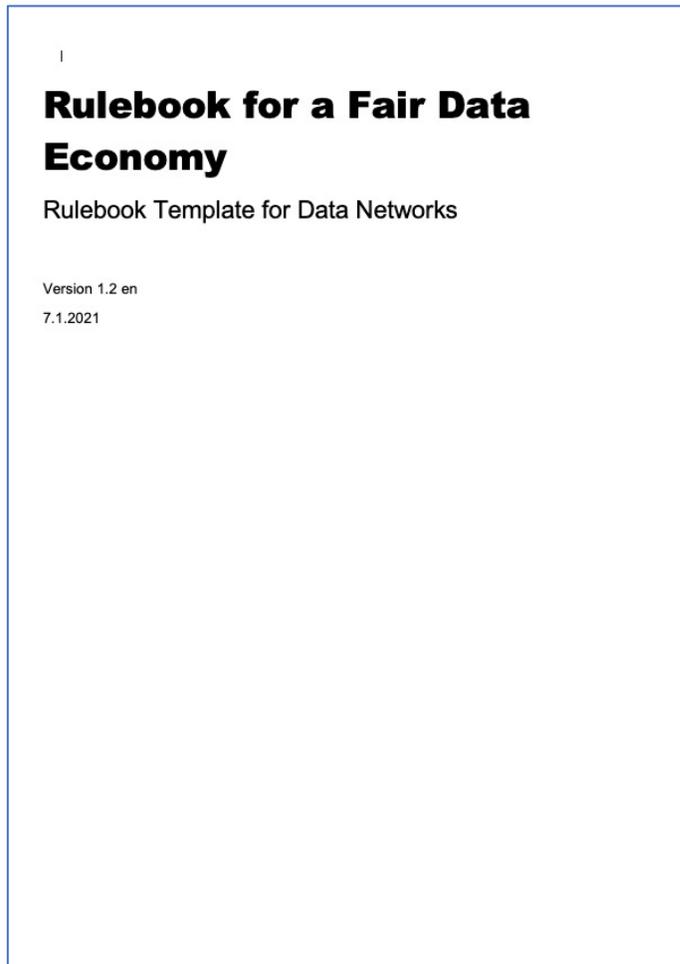

Sääntökirja toimii ohjenuorana dataverkoston aikaisesta liiketoiminnallisesta ideoinnista toimintamallin määrittelyyn ja sopimukseen asti:

- **Tarkistuslistat** business, technology, data, legal and ethical
- **Data Ecosystem Canvas**
- **Code of Conduct**
- **Sopimus pohjat**

<https://www.sitra.fi/en/publications/rulebook-for-a-fair-data-economy/>

IDSA suosittelee Sitran sääntökirjamallia

Reilu datatalous lähtee liikkeelle yksittäisistä organisaatioista

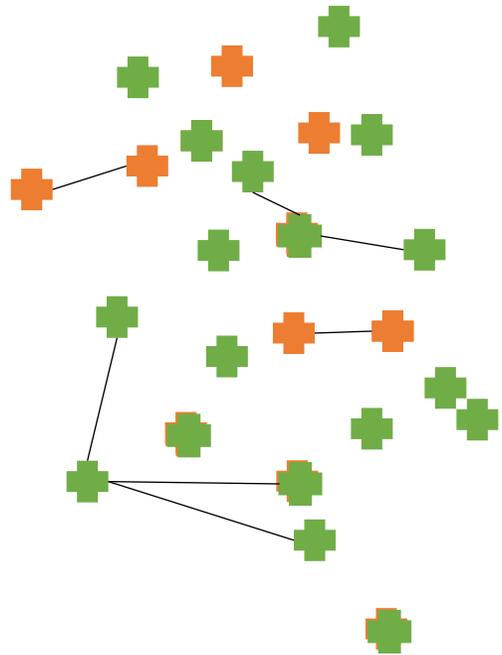

Organisaatio, joka ei noudata reiluja sääntöjä

Organisaatio, joka noudattaa reiluja sääntöjä

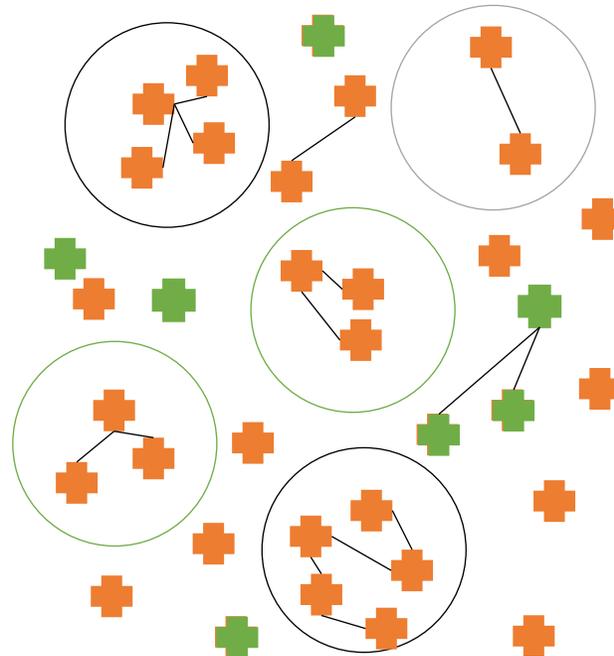

Jotkut organisaatiot noudattavat reilun datatalouden periaatteita

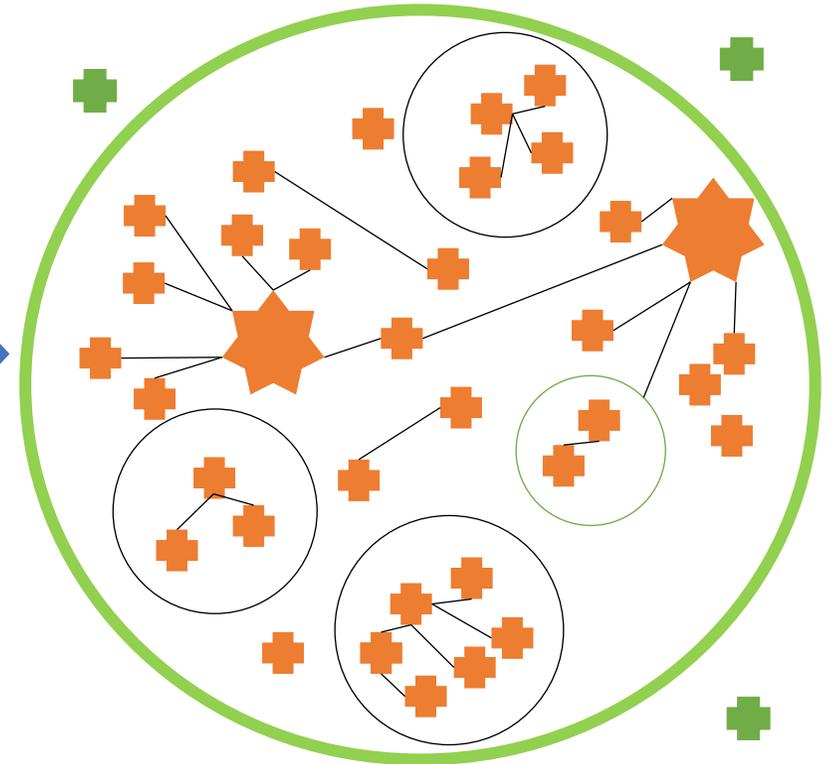

Uusi regulaatio, teknologia, yhteiset säännöt -> **datan käytön lisääminen**

Yksittäiset organisaatiot ja jotkut dataverkostot noudattavat reilun datatalouden periaatteita

Lisää regulaatiota, teknologiaa ja yhteisiä sääntöjä -> **datan jakaminen**

Organisaatiot noudattavat reilun datatalouden periaatteita

Syntyy mahdollistava regulaatio, teknologia ja yhteiset säännöt **reilulle datataloudelle.**

Kiitos!
