Not smart enough: The poverty of European military thinking on artificial intelligence

By Ulrike Esther Franke

https://www.ecfr.eu/publications/summary/not_smart_enough_poverty_european_military_thinking_artifi...

Until recently, the EU more or less ignored the defence and security **elements of AI**, but it has now begun to deal with the issue a little.

Finland offers crash course in artificial intelligence to EU

By Jari Tanner

https://lmtribune.com/world/finland-offers-crash-course-in-artificial-intelligence-to-eu/article_d9...

HELSINKI (AP) — Finland is offering a free-of-charge online course in artificial intelligence for European Union citizens in their own language, officials said Tuesday. The Nordic nation, headed by the world's youngest head of government, will mark the end of its rotating presidency of the EU with a highly ambitious goal. Finland is aiming to give practical understanding of AI to 1% of EU citizens — or about 5 million people — through a basic online course by the end of 2021.

Finland offers crash course in artificial intelligence to EU

<https://reviewtimes.com/business-news/2019/12/17/finland-offers-crash-course-in-artificial-intellig...>

HELSINKI (AP) — Finland is offering a free-of-charge online course in artificial intelligence for European Union citizens in their own language, officials said Tuesday. The Nordic nation, headed by the world's youngest head of government, will mark the end of its rotating presidency of the EU with a highly ambitious goal. Finland is aiming to give practical understanding of AI to 1% of EU citizens — or about 5 million people — through a basic online course by the end of 2021.

Finland offers crash course in artificial intelligence to EU

By Jari Tanner

<https://www.newsadvance.com/news/national/wire/finland-offers-crash-course-in-artificial-intelligen...>

HELSINKI (AP) — Finland is offering a free-of-charge online course in artificial intelligence for European Union citizens in their own language, officials said Tuesday. The Nordic nation, headed by the world's youngest head of government, will mark the end of its rotating presidency of the EU with a highly ambitious goal. Finland is aiming to give practical understanding of AI to 1% of EU citizens — or about 5 million people — through a basic online course by the end of 2021.

HELSINKI Finland is offering a free-of-charge online course in artificial intelligence for European Union citizens in their own language, officials said Tuesday. The Nordic nation, headed by the world's youngest head of government, will mark the end of its rotating presidency of the EU with a highly ambitious goal. Finland is aiming to give practical understanding of AI to 1% of EU citizens — or about 5 million people — through a basic online course by the end of 2021.
