

Hello team,

We're contacting you regarding the recently announced changes to .fi domain fees.

The increase of the annual fee from €9 to €12, combined with the introduction of a €400 registrar fee, represents a substantial rise that could place additional pressure on small businesses and end users.

Implementing both measures simultaneously may discourage .fi registrations and negatively affect the domain's overall competitiveness. We believe it would be more reasonable to introduce only one of these adjustments.

Kind regards,

Costrar EOOD
